About Us

Meet the Team

The Beachside Battery Bots (Team #32357) is a nonprofit FIRST Robotics team located at Beachside High School in St. Johns, Florida.

Our team has over 20 dedicated members, each working on different aspects of robotics in sub-teams. We welcome and encourage all students to join with no prior experience needed.

Our Goal

To provide students hands on experiences and opportunities in technology and focusing on innovation, problem solving, computer-aided design, teamwork, and competition. We strive to inspire young people in our community to explore various careers in STEM fields.

What We Do

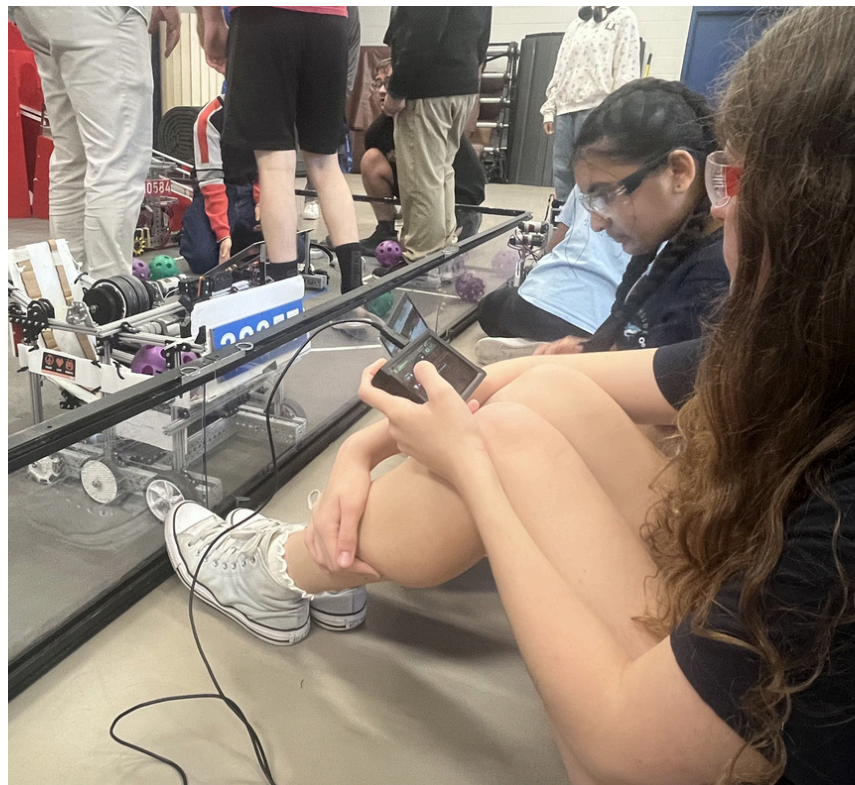

In the Beachside Battery Bots, we participate in the First Tech Challenge, competing in an uplifting and supportive environment. We strive to teach ourselves both technical and non-technical skills, as well as build connections within our community and friendships within our team as we create our robots.

We built our first FTC robot, “*Julius Caesar*”, in the 2025-2026 season “Decode”. While this was our second season in FIRST, it was our first season in FTC.

Students learn:

- Engineering principals to design and create robots
- CAD Software and application (OnShape)
- Collaboration with teammates and mentors
- Tool and machinery application
- Object-oriented programming (Java or block coding)
- Leadership and public speaking

What is FIRST?

FIRST (For the Inspiration and Recognition of Science and Technology) is a youth robotics organization aimed at educating, inspiring, and engaging students in STEM, preparing them for STEM careers and leadership in an inclusive, team-based environment

FTC (First Tech Challenge) offers middle and high school students in robotics design, programming, and competition. Students work with mentors to compete in an exciting game released every September. Students will engage in community outreach, engineering innovation, and build the confidence to help them succeed in life.

“It’s not just about robots. It’s about building self-confidence, respect, and important relationships with people who invent new technologies to make a better future.”

- DEAN KAMEN, FOUNDER, FIRST

What We Need

Category	Budget
Registration Fees	\$700
Robot materials and tools (mechanical, electronic, etc.)	\$2,000
Meals and transportation	\$1,700
Other (team shirts, marketing, etc.)	\$300

Funding

Money we receive goes to parts, materials, tools, and equipment needed to build our robot for the upcoming FTC season. Money also goes to funding registration fees, meals, transportation, and club shirts. This budget above is a rough estimate of what we need throughout each season. Each donation given is greatly appreciated and funds our mission to engage and inspire students in STEM.

How You Can Help

- **Financial Donation:** Sponsoring our team helps ensure that we can keep providing robotics and STEM engagement to all our students.
- **Material Donation:** Any donation of tools, materials, 3D printer access or filament, or any other resource is greatly appreciated. Please email us if you have specific material donations.
- **Fuel the Team:** During the FTC season, we spend countless hours creating our robot. Donations of meals and snacks are very appreciated!
- **Mentorship:** Mentors to share experience and guide students through the engineering process is vital to our mission to provide students in hands-on STEM opportunities.

Sponsorship Levels

It is thanks to our sponsors that we can carry out our mission to inspire STEM in our community, so we want to show appreciation!

Blue (\$750+)

- Prominent logo on competition robot
- Prominent logo on team shirt
- Social media story
- Fundraiser night featuring our competition robot
- Mention in competition portfolio
- Merchandise handed out at FTC events
- Thanks displayed in school hallways
- A thank you letter from the team

Green (\$400-\$750)

- Logo on competition robot
- Logo on team shirt
- Social media story
- Mention in competition portfolio
- Thanks displayed in school hallways
- A thank you letter from the team

White (\$200-\$400)

- Logo on team shirt
- Social media story
- Mention in competition portfolio
- A thank you letter from the team
